Magnetic End Effector

275 kg pneumatic

An end effector that, when integrated in Quick-Lift System™, meets the highest standards of ergonomics, working environment, safety and efficiency.

Unique integrated mechanical, electrical, pneumatic swivel enables continuous rotation of the end effector.

Easy to use, thanks to outstanding responsiveness, regardless of load weight.

Exceptional safety is achieved using our intelligent control systems.

High cost efficiency through high reliability and long durability.

A strong solution for quick and easy handling.
Magnetic End Effector

275 kg pneumatic

The figures are to be seen as indications and will vary depending on lifting objects.

<tbody>
<tr>
<td>Lifting Capacity</td>
<td>Maximum lifting capacity varies depending on lifting object shape Note: The lifting capacity is reduced if the lifting objects center of gravity is eccentric</td>
</tr>
</tbody>
</table>
| Steel plate                     | Thickness 25 mm  300 kg  
Thickness 20 mm  270 kg  
Thickness 15 mm  210 kg  
Thickness 10 mm  150 kg  
Note: For steel plates < 25 mm magnetism can occur underneath the plate. |
| Round steel                     | ø 60-250 mm, Maximum length 1500 mm Maximum weight 135 kg |
| Temperature                     | Maximum temperature on lifting object 50° C. |
| Product weight                  | 21 Kg / 46 lbs |
| Air supply                      | Clean dry air, filtered, pressure 6,0-8,0 Bar |
| Safety                          | 3x safety has to be tested on each lifting object |
