Quick-Lift Arm Torque
QLAT 350s

Intelligent lifting device which meets the highest standards of ergonomics, working environment, safety and efficiency.

Provides possibility to effortlessly handle eccentric loads.

Easy to use, thanks to outstanding responsiveness, regardless of load weight.

Exceptional safety is achieved using our intelligent control systems.

High cost efficiency through high reliability, increased productivity and long durability.

Binar
Improving your productivity
Quick-Lift Arm Torque  QLAT 350s

**Lifting capacity**
Depending on horizontal and vertical arm length. Calculation needs to be performed. Max bending moment 350Nm at gripper base.

**Lift motor**
Stepless servo-controlled asynchronous motor.

**Manoeuvring**
Manuvering is done with Quick-Lifts patented maneuvering handle. Only a small force is needed to engage the up/down motion. When the operator let go of the handle, the up/down motion is immediately stopped.

**Power supply**
230V, 50-60 Hz, 1-phase with ground protection, 10A.

**Stroke length**
2.7 meter.

**Hinged arm**
Made in painted aluminum profiles, and vertical profiles in anodized aluminum.

**Suspension**
Floor pillar in painted steel with standard height of 3 m. Optional pillar height up to 5 m.

**Gripping device**
Grippers are designed to fit customers need. Intelligent I/O signals are available for optimum functionality.
